-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 15 December 2003.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Independent claims 1, 4, 10, and 16 are generally vague and confusing, and oftentimes, the examiner is unsure what applicant is attempting to claim. The claims generally do not conform with proper English grammar. For example, claim 1 recites "...where in the beam path for a purpose of optical compensation." This is not a complete sentence. Also, claim 1 states "being situated at least three optical transparent elements having an intimate contact being used in cooperation." This also is not a complete sentence. Claim 1 goes on to recite three different material properties: radiation absorption, radial thermal conducting, and thermal dispersion. However, the examiner is unsure of the significance of these properties; in other words, how do they relate to the rest of the claim? Claim 4 recites "onto said at least three optical elements for the purpose of compensation following material properties are distributable." This is not a complete or coherent sentence. Other examples of unclear language and improper English exist throughout the claims. The art rejection found below is based on the examiner's limited understanding of the claim language.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Byer '281.

With respect to claims 1-20, Byer teaches at least three optical elements (20, 22, and 24) situated in a beam path (figure 1) and being used in cooperation. Inherently, each of the optical elements 20, 22, and 24 have a degree of radiation absorption, radial thermal conducting, and thermal distribution.
